DMD JET MANAGEMENT

SKY HIGH INVESTMENT POSSIBILITIES, GROUNDED IN A HISTORY OF SUCCESS

DMD Jet Management was launched in 2021 by seasoned aviation and immigration professionals, to elevate the level of service and safety available to private jet travelers, while utilizing private jet aircraft as an immigration vehicle for its discerning investors. Our flight operations are located at Fort Lauderdale Executive Airport, however our customers can board their private jet at airports located throughout the United States and fly virtually anywhere on the planet.

Our business model is simple: We provide the finest, most convenient, and highly personalized service in the industry with a fleet that includes large-cabin, long-range, medium to super-size aircraft.

WHERE WE FLY

Our footprint covers the entire globe, as our small to medium size jets service the continental United States, as well as Canada, the Caribbean, and Central and South America, while our larger jets can fly to Europe, Asia, and beyond.

THE IMMIGRATION PROCESS

Our Investors are incredibly private individuals who demand an immigration product that is as exclusive as they are. Whether our Investors are interested in an E-2 Visa or an EB1-C green card, our team of experienced attorneys, immigration professionals, and aviation experts provide white glove service throughout the process, that begins with understanding our Investor's immigration goals and budget to select a jet aircraft that will not only be profitable but will lead to an approval from the United States Consulate. Prices starting at \$2 million USD.

A WORLD-CLASS EXPERIENCE

DMD Jet Management operates out of an innovative "hanger headquarters" that houses our flight department and aircraft maintenance. For our owners and guests, this facility provides every convenience and luxury they might require while traveling with us, from an executive conference room to a private lounge to a full kitchen. From light jets with prices starting a \$2-3 million to large jets priced at over \$10 million, we will locate an aircraft that meets our Investor's needs, as well as those of the plane leasing public. We ensure the utmost discretion and safety with a 24-hour security detail and on-site CCTV camera monitoring.
